

Press Release Summary: Perfective Ceuticals Anti-Imperfection Eye Therapy:Non-Surgical Solution Against Aging Eyes

It is a fact we cannot escape: the inevitable signs of aging are a part of any person's natural life cycle. Gravity's cruel grasp over the years makes it mark by sagging and wrinkling facial tissue. Nowhere is this more evident than around the eyes. To project a fresh, youthful appearance, most people apply concealers and foundation around the eyes when they see the formation of bags and dark circles. Whatever methods used to camouflage, superficial artistry does not provide any effective reverse against the effects of sagging and dark under eye rings, nor does it mend wrinkles lingering around the corners of the eye.

Perfective Ceuticals Anti-imperfection Eye Therapy with Growth Factor uses holistic wisdom in combination with cutting edge biochemical formulations to provide hope against the signs of aging. Perfective Ceuticals' Divine Age Guardian ingredients, in conjunction with Growth Factors and Peptides, help to accelerate cell renewal and the production of collagen and elastin from the subsurface of the skin. An "Eyelift in a Bottle," Anti-imperfection Eye Therapy with Growth Factor improves the firmness of the skin around the eyes for maximum reduction of fine lines surrounding the eye.

To ensure a complete, all inclusive anti-aging eye care solution, Anti-imperfection Eye Therapy with Growth Factor also includes a potent component, namely Argireline/Acetyl Hexapeptide-3. Argireline is a hexapeptide (a chain of 6 amino acids) working to inhibiting the release of neurotransmitters. Topical application relaxes facial tension, leading to the appearance of fewer fine lines and wrinkles.

Intensive scientific research aside, Perfective Ceuticals embraces and promotes the understanding that, in their goals to create a better product, they cannot ignore what is available outside the confines of their laboratories. Natural ingredients found in our environment have been proven effective and Perfective Ceuticals embraces that idea in the creation of the formula. Sagging eye bags, wrinkles and dark circles are caused by the lack of Vitamins A and E which is why Perfective Ceuticals included healthy amounts in their formula to ensure skin staying radiant, healthy and elastic. A union of its laboratory-grade Retinol and Vitamin E coupled with the finest Ginseng root is just another example of how Perfective Ceuticals provides its customers the best, all-encompassing solution to "Love the Years, Erase the Lines."

The Perfective Ceuticals product line is available at www.perfectiveceuticals.com and select dermatologist offices worldwide.
