

Press Release Summary: A new ground in anti-aging skin care utilizing a powerful synergistic combination of Growth Factors with ancient Aboriginal Emu Oil techniques.

As we age, our skin cells drop off in the speed and effectiveness of their renewal process. Depleted moisture levels and years of wear-and-tear leave the skin tired out.

This is where Perfective Ceuticals Divine Age Guardian Cream with Growth Factor comes to the rescue. Incorporating the latest in anti-aging technology, Perfective Ceuticals Divine Age Guardian Cream with Growth Factor utilizes a powerful synergistic combination of Growth Factors to stimulate the skin cells to produce the much-needed collagen and elastin. Combined with a special propriety blend of Olive Squalane, Licorice Extract, Raffinose, Retinol, antioxidants and Emu Oil, which has been used by Aborigines to heal and calm the skin against the harsh winds and burning sun of the outback, these wonders of the natural landscape work synergistically as agents of anti-pigmentation, protection, restoration, and super-hydration.

This union of traditional and cutting edge cosmetic expertise helps to not only repair the skin and minimize the effects of aging, but it actually reprograms your skin for the restoration and re-growth of healthy skin cells. The result is healthy, younger looking skin. Say goodbye to wrinkles and fine lines as the complexion emerges even, brightened, and restored.

Working with the finest biochemists in skin care research, Perfective Ceuticals blends the technological advances of science with the time-honored wisdom of the natural world to create a line of superior anti-aging products. Relying upon only the highest-quality ingredients, Perfective Ceuticals guarantees the youthful, glowing results their discerning clients seek. The company also offers research, consultation and production services for cosmetic companies, dermatologists and physicians. The Perfective Ceuticals product line is available at www.perfectiveceuticals.com and select dermatologist offices worldwide.
