

Press Release Summary: Botany Teams Up With Biotechnology to Fight Wrinkles: Announcing Perfective Ceuticals' Divine Age Guardian Serum With Growth Factor

Perfective Ceuticals, the industry leader in anti-aging and anti-wrinkle formulas, is pleased to announce the newest addition to its unique skincare line for the maturing woman: Divine Age Guardian Serum with Growth Factor to reduce wrinkles and fine lines.

Perfective Ceuticals introduces Divine Age Guardian Serum with Growth Factor to its already effective and potent line of anti-aging products that money can buy. Blending the best of the natural world with the latest advances in biotechnology, Divine Age Guardian Serum with Growth Factor is a must have for any woman who is unhappy with the affects of both age and the environment on her face and skin. Perfective Ceuticals believes that when it comes to preserving and restoring that youthful glow and radiance, only the finest ingredients achieve these desired results.

As skin ages, wrinkles develop because of the breakdown of collagen and elastin in the skin's cells. Using a scientifically proven formula that includes the company's signature Growth Factors, combined with Amino Peptide works against these natural processes, restoring collagen, elastin, and other skin proteins, and stimulating new cell growth. The result is a marked reduction in fine lines and wrinkles, for brightened, restored, younger-looking skin.

Another key ingredient in healthy, youthful skin is hydration. Hydrating the skin's cells guards against puffiness, sagging and the effects of age. By incorporating the use of Hyaluronic Acid, Divine Age Guardian Serum with Growth Factor, which allows skin to lock in moisture 1,000 times its weight.

Relying on the wisdom and healing power of nature, Perfective Ceuticals' serum recipe also blends in a natural, herbal component of Gentiana Lutea Root Extract, Panax Ginseng Root Extract, and Vitis Vinifera (Grape) Seed Extract. The anti-pigmentation and moisture enhancing properties of these extracts result in soft, supple skin and an even complexion.

Working with the finest biochemists in skin care research, Divine Age Guardian Serum with Growth Factor blends the technological advances of science with the time-honored wisdom of the natural world to create a line of superior anti-aging products. Relying upon only the highest-quality ingredients, Perfective Ceuticals guarantees the youthful, glowing results their discerning clients seek. The company also offers research, consultation and production services for cosmetic companies, dermatologists and physicians. The Perfective Ceuticals product line is available at www.perfectiveceuticals.com and select dermatologist offices worldwide.
